

The San Angelo Opportunity Index

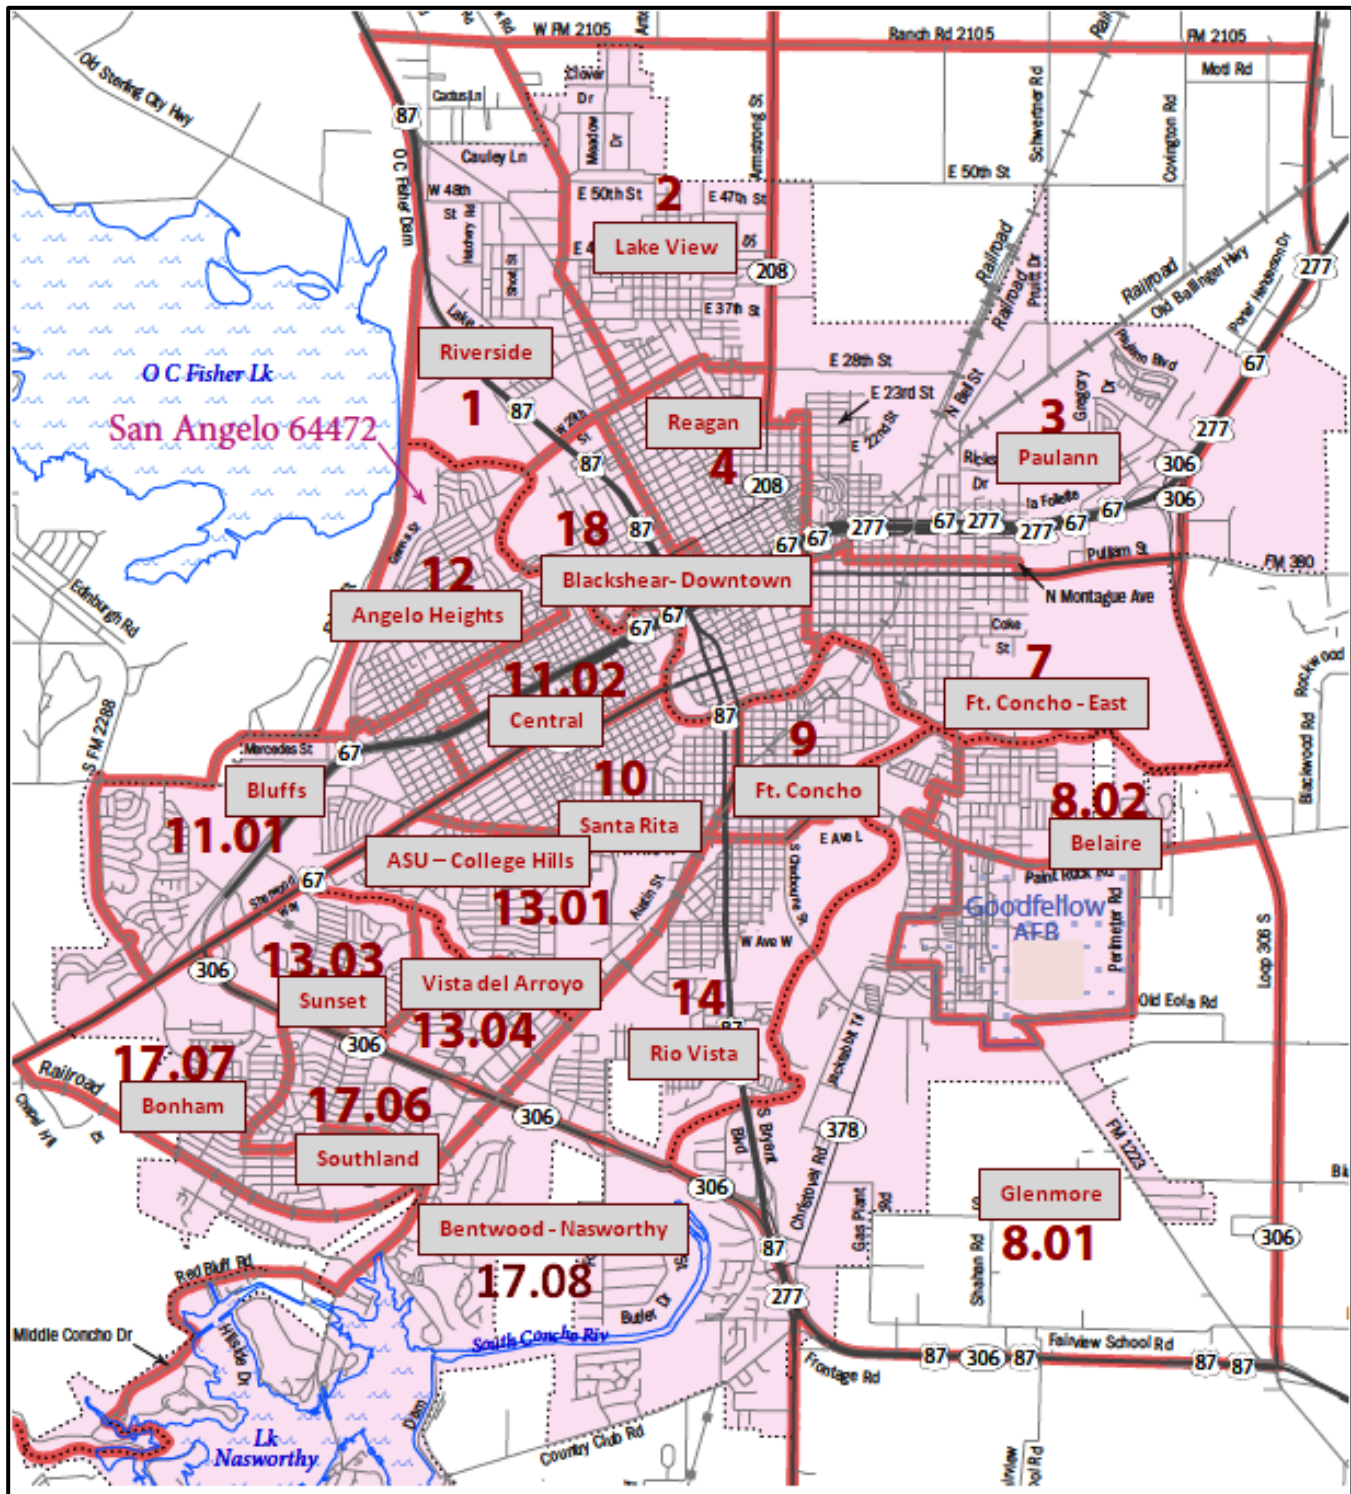

Kenneth L. Stewart

March, 2017

***The San Angelo Opportunity Index is a project of
Community Development Initiatives,
a community engagement program at the
ASU Center for Community Wellness, Engagement, and Development***

The San Angelo Opportunity Index was developed by the Community Development Initiatives to provide public information comparing the capacity of neighborhoods to support opportunities for residents. The Index compiles information from the US Census Bureau, the Texas Education Agency, the San Angelo Police Department, and the Tom Green County Election and Voter Registration Office. Data retrieved from these sources covers the 20 census tract neighborhoods depicted in the following map.

Each neighborhood is rated on 20 indicators describing facets of neighborhoods that affect the accessibility of opportunities by residents. The indicators form a comprehensive index, divided into four groups including social capital, education, economy, and health. The following list describes the indicators in each group and reports the neighborhoods with the highest and lowest results. Neighborhoods listed in green color are most supportive of opportunity for residents. Those listed in red are less so.

❖ Social Capital

1. Voting in 2016 Presidential Election
 - High = Southland 79.2%
 - Low = Blackshear-Downtown 8.1%
2. Cost Burdened Households
 - High = Blackshear-Downtown 43.5%
 - Low = Bentwood-Nasworthy 18.4%
3. Single Parent Families in Poverty
 - High = Blackshear-Downtown 17.7%
 - Low = ASU-College Hills 2.2%
4. Crime Rate
 - High = Blackshear-Downtown 188.46
 - Low = Bentwood-Nasworthy 16.64
5. Neighborhood Portion of Total Uninsured
 - High = ASU-College Hills 10.8%
 - Low = Vista del Arroyo 1.8%

❖ Education

1. Elementary Students Grade Level Proficiency
 - High = Glenmore 94%
 - Low = Riverside and Lakeview 65%
2. Students from Low Income Households
 - High = Reagan 89%
 - Low = Southland 27%
3. Unenrolled per Enrolled Preschooler
 - High = Rio Vista 5.5
 - Low = Bonham 0.0
4. Student Teacher Ratio
 - High = Lake View 18
 - Low = Reagan 13.4
5. Elementary Students Reading Postsecondary Readiness
 - High = Ft. Concho 65%
 - Low = Angelo Heights 28%

❖ Economy

1. Labor Force Participation
 - High = Santa Rita 71.8%
 - Low = Blackshear-Downtown 45%
2. Employed Workers Holding More than One Job
 - High = Ft. Concho 8.1%
 - Low = Bentwood-Nasworthy 5.7%
3. Workers in Production Occupations
 - High = Reagan 46.1%
 - Low = Southland 10.7%
4. Workers in Entry Level Jobs
 - High = Ft. Concho 72%
 - Low = Bentwood-Nasworthy 35%
5. Workers Traveling Under 15 Minutes to Work
 - High = Bluffs 36.6%
 - Low = Lake View 8.2%

❖ Health

1. Vision Disability
 - High = Ft. Concho 37.3%
 - Low = Vista del Arroyo 5.7%
2. Cognitive Disability
 - High = Rio Vista 54.9%
 - Low = Southland 17.8%
3. Households with Disabled Persons Using Food Stamps
 - High = Blackshear-Downtown 20.7%
 - Low = Bentwood-Nasworthy 0.0%
4. Households Using Food Stamps
 - High = Blackshear-Downtown 35.3%
 - Low = Bonham 1.8%
5. Uninsured Persons Under 65
 - High = Ft. Concho 36.1%
 - Low = Bentwood-Nasworthy 6.7%

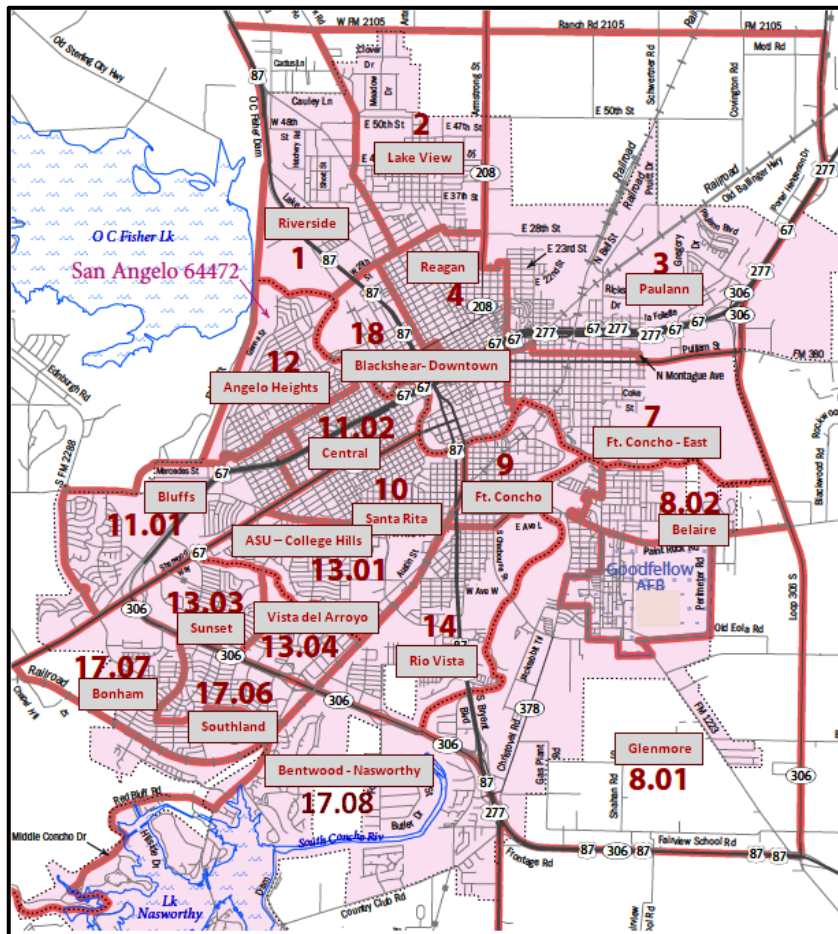

The San Angelo Opportunity Index Neighborhood Fact Sheets

This section provides fact sheets for each of the 20 census tract neighborhoods of San Angelo. The fact sheets are organized by tract number. They report outcomes for each of the 20 indicators in the Opportunity Index. Citywide results provide comparison and context, and the neighborhood score and rank on the overall index is recorded in the fact sheet.

Data reported is from the following sources:

The US Census Bureau, 2011-2015 American Community Survey
The San Angelo Police Department
The Tom Green County Election and Voter Registration Office
The Texas Education Agency

The San Angelo Opportunity Index is a project of Community Development Initiatives at the Angelo State University Center for Community Wellness, Engagement, and Development.

1. Households are considered cost burdened when 30 percent or more of a household income goes to housing costs.

2. This represents the students attending elementary schools serving the neighborhood who met the satisfactory standard on the State of Texas Assessment of Academic Readiness (STAAR) reading test for their specific grade.

3. Students from low income households are identified as economically disadvantaged in Texas Academic Performance Reports.

4. This represents the students attending elementary schools serving the neighborhood who are sufficiently prepared for high school success according to STAAR testing results.

5. Production occupations focus on the production and distribution of goods. They include natural resources, construction, and maintenance, and production, transportation and material moving occupations

6. Entry level jobs are low skill occupations in healthcare support, firefighting, prevention, other protective services, food preparation and serving, building/grounds cleaning and maintenance, personal care, sales, office and administrative support, farming, fishing, and forestry, production, and material moving. Median earnings of workers in these jobs are below the city median for occupations.

7. Households receiving food stamps are counted as food insecure.

1. Households are considered cost burdened when 30 percent or more of a household income goes to housing costs.

2. This represents the students attending elementary schools serving the neighborhood who met the satisfactory standard on the State of Texas Assessment of Academic Readiness (STAAR) reading test for their specific grade.

3. Students from low income households are identified as economically disadvantaged in Texas Academic Performance Reports.

4. This represents the students attending elementary schools serving the neighborhood who are sufficiently prepared for high school success according to STAAR testing results.

5. Production occupations focus on the production and distribution of goods. They include natural resources, construction, and maintenance, and production, transportation and material moving occupations

6. Entry level jobs are low skill occupations in healthcare support, firefighting, prevention, other protective services, food preparation and serving, building/grounds cleaning and maintenance, personal care, sales, office and administrative support, farming, fishing, and forestry, production, and material moving. Median earnings of workers in these jobs are below the city median for occupations.

7. Households receiving food stamps are counted as food insecure.

1. Households are considered cost burdened when 30 percent or more of a household income goes to housing costs.
2. This represents the students attending elementary schools serving the neighborhood who met the satisfactory standard on the State of Texas Assessment of Academic Readiness (STAAR) reading test for their specific grade.
3. Students from low income households are identified as economically disadvantaged in Texas Academic Performance Reports.
4. This represents the students attending elementary schools serving the neighborhood who are sufficiently prepared for high school success according to STAAR testing results.
5. Production occupations focus on the production and distribution of goods. They include natural resources, construction, and maintenance, and production, transportation and material moving occupations.
6. Entry level jobs are low skill occupations in healthcare support, firefighting, prevention, other protective services, food preparation and serving, building/grounds cleaning and maintenance, personal care, sales, office and administrative support, farming, fishing, and forestry, production, and material moving. The earnings of workers in these jobs are below the city median.
7. Households receiving food stamps are counted as food insecure.

1. Households are considered cost burdened when 30 percent or more of a household income goes to housing costs.
2. This represents the students attending elementary schools serving the neighborhood who met the satisfactory standard on the State of Texas Assessment of Academic Readiness (STAAR) reading test for their specific grade.
3. Students from low income households are identified as economically disadvantaged in Texas Academic Performance Reports.
4. This represents the students attending elementary schools serving the neighborhood who are sufficiently prepared for high school success according to STAAR testing results.
5. Production occupations focus on the production and distribution of good
6. Entry level jobs are low skill occupations in healthcare support, firefighting, prevention, other protective services, food preparation and serving, building/grounds cleaning and maintenance, personal care, sales, office and administrative support, farming, fishing, and forestry, production, and material moving. Median earnings of workers in these jobs are below the city median for occupations.
7. Households receiving food stamps are counted as food insecure.

The Summary Table grades each neighborhood on a 100 point scale based on the 20 indicators. The neighborhood with the best results received a score of 100 and the least advantaged one received a score of 0. Scores for other neighborhoods reflect where they fall in comparison to the best and least results. The “Opportunity Score” depicts the capacity of each neighborhood to support opportunities among residents.

We are grateful for the participation of Bob Salas, Neighborhood and Family Service Director for San Angelo, in the development of the Opportunity Index.

The San Angelo Opportunity Index is a project of
Community Development Initiatives,
a community engagement program at the
ASU Center for Community Wellness, Engagement, and Development
